WITHDRAWN BY APPLICANT

APR 16 1981

William J. Geerman
STATE ENGINEER

Application No. 30751:

This permit to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 24977, Certificate 7260, is issued subject to the terms and conditions imposed in said Permit 24977, Certificate 7260, and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined amount of water granted under this permit and Permit 30750 is limited to what the well covered under the two permits is capable of producing. If certificates of appropriation are issued under this permit and Permit 30750, the total combined amount of appropriation granted in said certificates shall not exceed what the well covered under the two permits is capable of producing.

To prevent waste of water through seepage or evaporation caused by the great distance between the place of use and the point of diversion, it will be required that water allowed under this permit be transmitted through either concrete-lined ditch or pipeline. Such means of transmission must be installed before any use of the water begins or before the proof of completion of work is filed.

This permit is issued with the understanding that no expansion of water right acreage is allowed and that no additional withdrawal of ground water is allowed over that amount of ground water allowed under the base permit.
